> GALOOT RECORD .- The assemblage of galoots yesterday was made radiant, brilliant and beautiful by the presence of one of Columbus' fairest flowers-the gentle, young, lovely Mary Blizzard. Sister Blizzard has been missing from her accustomed berth in Castle Earhart for many days, and we were sad. She has returned. And we rejoice with exceeding great joy. She is beautiful, this Blizzard. Her nut brown hair hangs in gorgeous luxuriance in wavy masses down her back-that is it would so hang had it been combed this year. Her refulgent nose of reddest hue, her dreamy, watery black eye-she had two black eyes. her husband gave them to her—her mas-sive forehead, at least one and one-half inches in hight; her lovely mouth and pearly teeth, handsomely stained with the juice of a chaw of navy tobacco; her perfumed breath smelling of the fragrance draughts of benzine whisky; all these go to make up the tout ensemble of the divine Blizzard. Sister Blizzard had been drunk, and Sister Blizzard looked hard. She was scorted to Castle Earhart, where for thirty

days she will reign Queen of Love and Beauty. Joe Bentz came into town Thursday to see the rulns of the Lunatic Asylum. The sight overcame him. He sought consolation in copious draughts of benzine. One of Joe's peculiarities is that whenever he gets drunk he must be making speeches. He so roared and bellowed that office Engleke day. The matter of the location of the fore. Before the Mayor yesterday he plead guilty to the larceny. The Mayor, notwithstanding, bound him over in the sum of \$300, remarking that in that way perhaps the city would be rid of him for a time. Blizzard's answer was right cool: "No, you don't, Mayor, I'll stay with you till the last horn blows, you bet."

WASHINGTON. Report of General Sherman.

General Sherman's report of affairs in the military division of the Missouri has just been received at the War Department, together with those of Generals Sheridan, Auger and Terry. Gen. Sherman says that these reports show that while the country generally has been at peace, the people on the plains and the troops of his command have been constantly at war. He says he has studied to find some lasting remedy for this war, but thus lar without success. Our people will settle on the frontiers and travel without precaution, and run

after wild reports of gold discoveries, and thus come in contact with hostile savages. Surveys of public lands continues to be extended and patents granted occupants to build railroads and establish mail routes, as though all was peaceful.

Over all these matters the military authorities have no control; yet they are call-

thorities have no control; yet they are called upon for protection and subjected to all the kicks and cuffs without the privilege of advising or being consulted. So long as these things continue the military forces on the frontier cannot be reduced.

We had been directed by the President to subordinate the acts of all the troops to whatever plan of action the latest peace commission might adopt. This commis-sion unanimously agreed that all the Indi-ans east of the Rocky Mountains should, as soon as possible, be collected on reserva-tions as far as possible from white settlements and lines of travel, and be maintain-

Other provisions were made, all of which were wise and judicious. Councils had been held by the Peace Commissioners with all or nearly all the tribes, formal written treaties were made and nearly all confirmed by the Senate, but for some reason Congress did not take action on the chief proposition of the Commissioners, which related to selling a part of the reservations, and providing a government for the Indians. The people had said this was the cause of the failure in securing a lasting peace. It is always difficult to le rn cause of war on the part of the Indians, as they never give notice beforet and

It was, however, August before the posts could be withdrawn, and the Indians followed up the parties having the stores in charge and made raids on them. They been consulted, and have contracted to furnish special cars from Cincinnati, Sandusky, Dayton, Piqua, Columbus and Akron, and all intermediate points—passengers for Urbana free of fare.

The General then proceeds to recite in detail the hostilities of the Indians, which have already been published, to show that the Government agents gave them only the kindest treatment, with one exception,

the Smoky Hill and Arkansas roads by the Indians attacking all white people, who knew nothing of the renewed hostilities. Gen. Sheridan, seeing war with the Chey-ennes inevitable, endeavored to keep the Arapahoes out of it. In a council with them they agreed to keep out of the war and go to the reservation. Instead, how-ever, at the time they agreed to move they vere in the war. The Kiowas and Commanches acted in the same way. General Sherman gives dispatches from territorial Governors setting forth the hos-

ile acts of these Indians. The Government Kansas was especially restive under the butcheries perpetrated in that State, and endered volunteer cavalry to General Sherman. General Sheridan was doing all he possibly could to afford protection, but with a limited number of troops could not follow the Indians to their remote retreats. Gen. Sherman asked Gen. Grant for more cavalry and it was promptly furnished, and on the 6th of October the Secretary of War authorized the acceptance of one mounted regiment of Kansas volunteers for six months. Gen. Sheridan expects to get these in the field in November, and also expects, during the coming winter, to so punish these hostile Indians that they will not again resort to

war. 1 General Sherman believes he will meet with all the success he expects. It is idle for us longer to attempt to occupy the plains in common with these Indians, for the country is not susceptible of close settlement with farms like those of Missouri and Iowa, and is solely adapted to grazing. consignment from the East for this estab- accustomed game, and he will steal rather of that district of the country by these two classes of people, with such opposing in-terests, is a simple impossibility, and the

To labor hereditary pride of the Indian, who must be used to accomplish this result.

It was for this reason that the Peace Commission, at its Chicago session in October, after the events before described had occurred and were known to them, was torced to the conclusion that the management of Indian affairs should be transferred back to the Department, where it belonged Department, bells in the neatest and latest style. I am fully aware that many of our good people far removed from contact with these Indians, and dwelling with a painful inter-est on the past events, such as are describ-ed to have occurred in Missouri in 1864, and at the Chivington massacre in 1864, believe the whites are always in the wrong, and the Indians have been forced to resort to war in self-defense by actual want or by reason of our selfishness. I am more than convinced such is not the case in the pres-ent instance, and I hope I have made it cer-

I favor the belief that the only hope of saving any part of these Indiana from ut-ter annihilation is by a fair and prompt Peace Commission, which can alone be done by the Congress, with the concur-rence of the Indians themselves. QUEER preparations with queer names. are now-a-days compounded, almost without number, many unquestionably worthless, and many still worse, absolutely injurious. The Alisma is, we are convinced, an exception to either of these categories. We have seen it tried and know it will do as recommended, restore gray hair to its original color and lustre, and at the same time perform every function of a perfect hair dressing, which neither injures the texture of the hair, nor colors the linen or skin. For the purpose designated, we believe it to be the very best prepartion in use.—East Saginaw Courier. nov21-dawlt
